

Christianity and the Emerging Consciousness of Our Times

The world is engaged in the evolution of global consciousness. All of the major religions are challenged to retell their essential myth or truth in ways that meet this emerging consciousness or lose much of their relevance. The following are several themes that will be explored in the program.

- The need for Christianity to answer the deeper longing to of many for a mature, integrated, inner life and spiritual development.
- How to coexist respectfully with different faiths.
- The emergence of the feminine in its many forms of expression including fully honoring women.
- Re-imagining the sacred symbolic stories, rituals, and archetypes so they speak to the current needs of humanity.
- Embracing the divine within the body and the sacramental nature of sexuality.
- Dismantling of unhealthy psychological and social attitudes within the religion.
- Addressing the repressed fear contained in Christian fundamentalism.
- Participating in the unfoldment of a global myth that affirms the essential unity of humanity in the in the divine while honoring its divinity.

We shall participate in the practices and teachings from some of the great Christian mystics and those who are now contributing to the emergence of a new Christian paradigm.

Atum has offered a year-long program called “The Soul of Christianity”. This is a unique opportunity as he will not be teaching it again in Europe for several years.
