Four Worlds of Soul Program Description

The world soul has been used in many different ways by various traditions. In this seminar, we will explore the mystery of soul as it reveals itself in the following four dimensions.

The Inner World of the Psyche

Here we meet the archetypes within our psyche that inform our inner journey; the Anima and Animas, Shadow, and the Self along with parts of the personality. This world includes passages and transitions that bring new life and order to the psyche. The soul also creates the images which guide us in our symbolic life.

The World of the Unfolding Soul

This dimension of soul is associated with the divine seed or inheritance which lives within the soul and seeks manifestation. Here the divine qualities unfold in our personality and journey moving from potentiality to realization and fulfillment in the world.

The Soul of the World

This dimension encompasses the divine immanence in the natural world. Included here are the souls of place, tradition, peoples along with the myths and rituals which unify a community and infuse life with soul.

The Home of the Soul

This world is the opposite of the unfolding soul. Here there is a deep call and longing to return to the Source where one remembers the origin of the soul. In the state of transcendent soul, one is born again and healed from the struggle and demands of life.
