

## The Urgent Cry for Planetary Consciousness

"While The World Is Burning You Seek Profit. Why Are You Not Seeking A Lamp To Find Your Way In The Dark?" Buddha

This program is for those who have previously studied with Atum. Priority will be given to those who have completed the core training.

In our present time, humanity is in a profound transition of consciousness at a scale never encountered before. We are called by the Soul of Humanity to expand into a planetary consciousness, at a time, when presently, people are living in many different centuries on the Earth.

In deep transition, there can be no return to the past, for it is dissolving, and the new life and forms are not fully revealed and embodied. In such times there is the great fear of uncertainty, and the profoundly meaningful call to be a co-creator in the birthing. As Carl Jung wisely saw, in such transitions, the great myths and their traditions must be retold, to meet the developing greater consciousness.

In this training we shall explore this profound transformation we are living through, by identifying core elements of planetary conscious. We shall engage visionaries in the following traditions that are helping us find and trust the way.

Judaism:

Reb Zalman Schachter

Christianity:

Teilhard de Chardin, Marcus Borg, Cynthia Bourgeault, Martin Luther King, Mathew Fox, Helen Luke

Sufism:

Hazrat Inayat Khan, Pir Vilayat Khan, Taj Inayat, Noorunissa  
Inayat Khan

Buddhism:

Dalai Lama, Pema Chodron, Roshi Joan Halifax,  
Sharon Salzburg

The Emerging Feminine:

Frances Vaughan, Mariam Woodman, Karen Armstrong, Mary Oliver. These women teachers are spiritual teachers who do not represent a particular tradition but have made significant contributions to planetary consciousness.

The training in Planetary Consciousness has five three day meetings.

Seattle: Starting dates March 22-24, 2019
